

Play-Doh Snakes Craft

- Students will learn the first step to creating an olla using the coiled clay method, by forming snakes.

THINGS YOU'LL NEED:

- Clay or Play-Doh
- Hard surface

STEP #1:

Start rolling some clay or play-doh into long snakes. If you use your classroom desk, table at home, or hard surface it helps you roll out the snakes easier and more evenly.

STEP #2:

Once you have a long, even snake, it will then be wrapped onto itself, the coiled clay should look like a spiral as so.

Practice rolling another snake then coiling it just like before by repeating steps 1 & 2.
